

Better Evidence and UpToDate Training Module 4: Using Your Institutional Account

Contents

1. UpToDate Global Health Topics
2. Institutional Subscription
3. Continuing Medical Education (CME) Credit through UpToDate
4. Becoming an UpToDate Certified Trainer

Global Health Topics

- UpToDate has a selection of topics specific to global health:
<https://www.uptodate.com/contents/table-of-contents/infectious-diseases/global-health>

The screenshot shows the UpToDate website interface. At the top left is the UpToDate logo. To its right is a search bar with the placeholder text 'Search UpToDate' and a magnifying glass icon. Below the search bar is a blue navigation bar with the following items: 'Contents' (with a dropdown arrow), 'Calculators', 'Drug Interactions', and 'UpToDate Pathways'. Underneath the navigation bar is a grey bar labeled 'Global health'. Below this, there are two main categories: 'Cardiology' and 'Dermatology'. Under 'Cardiology', there are two items: 'Endomyocardial fibrosis' and 'Management and prevention of rheumatic heart disease'. Under 'Dermatology', there are five items: 'Chromoblastomycosis' (which is highlighted with a yellow border and a yellow arrow pointing to the right), 'Fogo selvagem (Brazilian endemic pemphigus foliaceus)', 'Impetigo', 'Lepidopterism: Skin disorders secondary to caterpillars and moths', and 'Lobomycosis'. Below 'Lobomycosis' are two more items: 'Orf virus infection' and 'Pedunculosis corporis'.

Chromoblastomycosis

Literature review current through: **Apr 2020**. | This topic last updated: **Jul 30, 2019**.

INTRODUCTION

Chromoblastomycosis (also known as chromomycosis) is a chronic, indolent, granulomatous fungal disease caused by the transcutaneous inoculation of propagules (spores) from several species of melanized fungi. Chromoblastomycosis occurs in tropical and subtropical climates and is one of the most common endemic implantation (subcutaneous) mycoses.

Global Health Topics

The screenshot shows the UpToDate website interface. At the top, the search bar contains 'acute diarrhea treatment'. The user is logged in as Chiara Taiana, with a CME score of 399.5. The navigation bar includes 'Contents', 'Calculators', 'Drug Interactions', and 'UpToDate Pathways'. The main content area displays search results for 'acute diarrhea treatment', with the 'Pediatric' filter selected. The first result is 'Approach to the child with acute diarrhea in resource-limited countries', which includes a summary and links to 'Treatment' and 'Summary'. The second result is 'Approach to diarrhea in children in resource-rich countries', which includes a summary and links to 'Algorithmic approach to the patient', 'Therapeutic interventions', 'Summary', and 'Acute diarrhea in children (Algorithms)'. The third result is 'Pathogenesis of acute diarrhea in children', and the fourth is 'Acute viral gastroenteritis in children in resource-rich countries: Clinical features and diagnosis'. A sidebar menu on the right lists various topics: 'Invasive (bloody) diarrhea', 'Associated conditions', 'CLINICAL ASSESSMENT', 'Classification of diarrhea', 'Hydration status', 'Nutritional status', 'Physical examination', 'Diagnostic studies', 'TREATMENT', 'Acute watery diarrhea', 'Fluid and electrolytes', 'Malnourished children', 'Nutrition', 'Vitamins and minerals', 'Zinc', and 'Vitamin A'. The bottom of the page shows a Windows taskbar with the time 4:59 PM on 3/3/2020.

Institutional Subscription

- To set up an individual account, **register for UpToDate from your home institution or from an affiliated facility with UpToDate coverage**
- To keep your **account active**, you must log in from your institution's network or an associated clinical facility once every 90 days (temporarily changed to 180 days for the duration of the COVID-19 pandemic)
- If you do not log in at least once every 90 days, your account will be deactivated
- To reactivate a deactivated account, you must **log in from your institution's network or an associated clinical facility**

- UpToDate is accredited and recognized as a continuing education resource by colleges, associations, and authorities from around the world
- UpToDate users in over 160 countries have redeemed CME credits through UpToDate use
- UpToDate offers formal accreditation in 21 countries
- UpToDate CME is accepted by 50+ accrediting bodies worldwide

UpToDate Certified Trainer Program

- If you are interested in deepening your knowledge of UpToDate and helping spread use of the tool at your institution, consider pursuing the [UpToDate Certified Trainer Program](#)

As an UpToDate Certified Trainer you will:

- Become an expert on using UpToDate to support colleagues within your institution
- Gain valuable insights before everyone else into all the features and benefits of using a clinical decision tool, like UpToDate
- Receive a framed certificate and customized poster to show your personal achievement and value to your institution

UpToDate Certified Trainer Program

Below is an outline of the steps you will take through the certification process:

- Fill out the [registration form](#)
- Complete Modules 1-5
- Pass Certification Test

Each module is approximately 15 minutes long. The entire process shouldn't take more than two hours of your time. Once you pass the certification test, you will become a member of a community of UpToDate advocates across the globe with access to:

- The UpToDate Certified Trainer Portal and Forum
- Customizable posters/tip sheets/templates and other materials
- Regional Certified Trainer and Clinical Advocate events
